

A NEW DIMENSION FOR THE CAVISTAR LINE

CaviStar + EcoStar

An efficient combination of technologies to demonstrate the results in real time and with the certainty of a precise echography.

This innovative association permits the professional the possibility to evaluate, register and appraise the changes that are produced at the fat tissue level as a consequence of the progressive application of Ultrasonic Cavitation. Also the integral software allows a rapid and complete formulation of reports about the treatment in predetermined templates.

What is the Echograph for?

This valued tool offers the possibility to capture, classify and save echographic images to accomplish an optimum evaluation and control the evolution of the patient in treatment. The complete reports can be printed for records or for giving to the patient.

Software especially designed for the follow up of patients through EcoStar.

EcoStar can be obtained with any of our Cavistar Line equipments.

Cavistar

Cavistar Basic

Cavistar Advance
